

www.kintpack.com

Packaging is the science, art, and technology of enclosing or protecting products for distribution, storage, sale, and use.

Packaging also refers to the process of design, evaluation, and production of packages.

Packaging can be described as a coordinated system of preparing goods for transport, warehousing, logistics, sale, and end use. Packaging contains, protects, preserves, transports, informs, and sells.[1]

In many countries it is fully integrated into government, business, institutional, industrial, and personal use.

FIBC - BIG BAG

CLASSICO / U PANEL

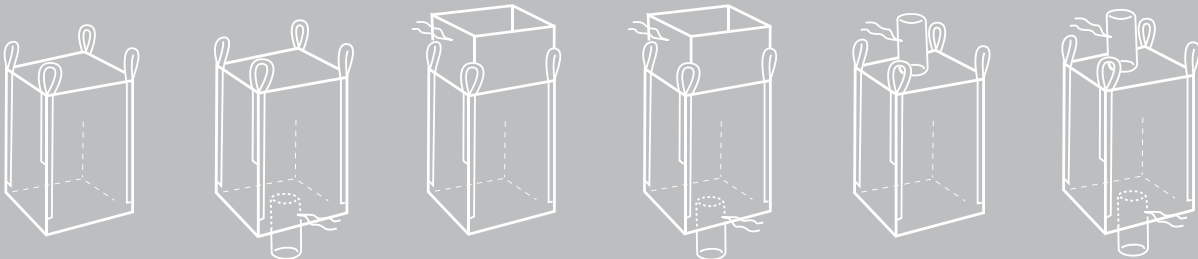

ITA

Certamente il Big Bag più diffuso grazie alla sua notevole versatilità, si presta a contenere le più svariate tipologie di prodotto. La particolare facilità di stoccaggio e movimentazione lo rendono senza dubbio tra i modelli più duttili della categoria.
TESSUTO IN RAFIA DI POLIPROPILENE CON TRATTAMENTO ANTI-UV

ENG

This model has the widest market share for sure, due to its high versatility, that make possible to contain the most various types of product. Easy to move, easy to stock, U Panel big bag could be the solution for several needs.
POLYPROPYLENE WITH UV TREATMENT, COATED OR UNCOATED

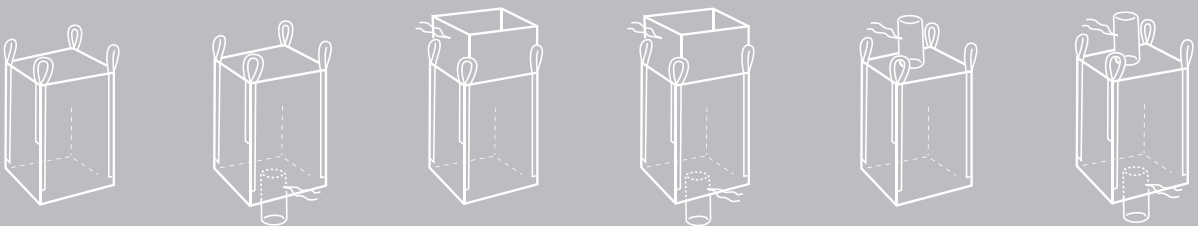

BIG BAG VENTILATO / VENTILATED BIG BAG

ITA

Principalmente dedicato al mercato alimentare dell'ortofrutta, tramite feritoie laterali agevola la traspirazione del prodotto che prosegue così nel suo ciclo di maturazione senza intaccarne qualità e freschezza. Soluzione all'avanguardia che coniuga funzionalità e protezione.

ENG

These product is mainly dedicated to the fruit and vegetables stocking market. Thanks to breathable stripes all around the body, goods here filled in are allowed to keep going on with the natural ripen process.

CUBO / Q-BAG

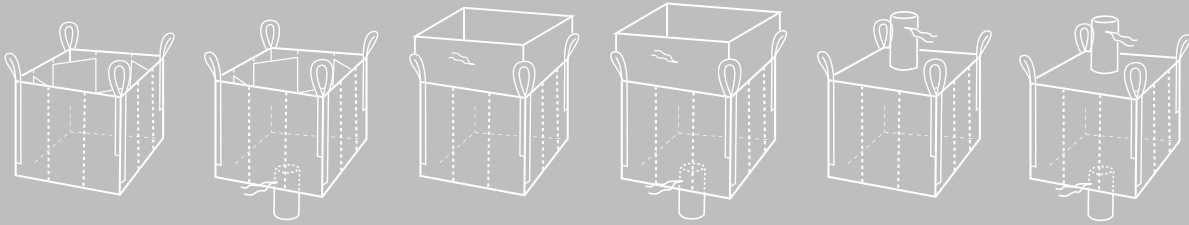

ITA

La peculiarità del Q-bag è rappresentata da particolari rinforzi interni che impediscono lo "spanciamento" e la deformazione del sacco durante la fase di riempimento. Pratico e robusto, è ideale per il contenimento di materiale granulare.
TESSUTO IN RAFIA DI POLIPROPILENE CON TRATTAMENTO ANTI-UV

ENG

Its peculiarity is a special internal reinforcement called baffle, that avoids the "bulge" and the deformation of the bag and ensures that the product flows uniformly into the corners during the filling process. Practical and tough, Q-bag is fine for granular material stocks.
POLYPROPYLENE WITH UV TREATMENT, COATED OR UNCOATED

PRATICO / CROSS CORNER

ITA

Il modello Pratico è fabbricato partendo da un tessuto tubolare, ovvero la struttura non presenta cuciture sui lati e le 4 larghe maniglie facilitano la movimentazione da parte degli operatori. Di ampia capacità, è una buona soluzione per molti prodotti quali materiale granulare o polveroso.
TESSUTO IN RAFIA DI POLIPROPILENE CON TRATTAMENTO ANTI-UV

ENG

Cross Corner Big Bag is manufactured starting from a tubular fabric: in this way the structure around the content is the most adherent you can obtain. Thanks to its large capacity, this model is a fitting solution for many products as granular material or fruit and vegetables.
POLYPROPYLENE WITH UV TREATMENT, COATED OR UNCOATED
